TANKER WATCH

Always keeping watch on tanker fillings!

Tanker Watch keeps an eye on truck tanker fillings. A mag meter monitors how much milk is being added to the tanker. PLC programmable touch-screen alarms allow for setting pounds of milk added and without probes in the tanker to malfunction, Tanker Watch is the ideal set of eyes to control over-loading and spillovers.

Tanker Watch Features:

- *Mag meter monitoring*
- *Alarm settings when pound amounts are met*
- *Prox switches on each valve at each tanker bay*
- *Tanker identification*
- *Transfers weight to correct tank*
- *Tracking for group weights*
- *Wash inhibit does not count wash water*

Tanker Watch Benefits:

- *No tank spill overs*
- *Very Accurate*
- *No probes in tanker to malfunction*
