

# Pure Harvest<sup>©</sup>

MEDIUM FRAME PASTEURIZER

## Features:

- The Medium Frame is more compact than the Large Frame model at only 54" wide x 18" deep and 64" high.
- Energy efficient by utilizing heat from the pasteurized discharged product and transfers it to the product.
- HTST (high temperature, short time).
- CIP (clean-in-place) wash.
- Chemical injection pumps as shown below with easy to change hoses.

- Commercial Stainless Steel Construction.
- Comes with electric boiler for ease in installation and setup. To make this machine even more energy efficient, you can add a natural gas or LP boiler (pictured.)

Control Panel Detail

Features:

Digital touch screens feature incoming product temperature, pasteurization cycles, outgoing product and flow rates along with cycle durations. Tank selections are made on the touch screen.

The wash screen allows for setting specific amounts of acid and detergent to be used for each tank/cycle. It can also specify which tanks to be washed. Acid and detergent levels in the source barrels are also monitored. The pasteurizer can wash up to four other tanks besides itself.
